

Dear Livestock and Seed Programs:

Please do NOT permit irradiated food to be served in the National School Lunch Program. Irradiated food has not been proven safe to eat. It degrades the nutritional content of food, and research has revealed a wide range of health problems in laboratory animals that ate irradiated food. In addition, it merely masks filthy and inhumane meat processing. Parents deserve the right-to-know what their children are eating, but irradiated food served in school cafeterias is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

Parents deserve to know all the facts.  
If it's not bad for us, don't keep  
it a secret.

Sincerely,

Name: Diane Leland  
Address: 1427 Aspen Ct #1  
City, State, Zip: Tukuma Pk. Md. 20912

Dear Livestock and Seed Programs:

Nothing was wrong with food the way  
it was created. By tampering with it we are  
bringing about health & ecological implications  
that cannot be taken back.

Sincerely,

Christina F. Jones
